

## Newforma LeanPlanner

Use visual planning software to realize the promise of lean.

On-time projects start with visible commitments. Newforma® LeanPlanner production planning software, powered by LeanKit, shows your team what they have to do, what work they're doing, and what they've done. Built for companies using lean methods to improve reliability and predictability, LeanPlanner slashes administrative chores while it improves reporting.

### Replace high-maintenance sticky notes and spreadsheets with a digital board.

- Manage virtual sticky notes on a cloud-based card wall.
- Manage your largest projects without worrying about physical space limitations.
- Generate reports without entering data twice.
- Always have current data without updating spreadsheets.
- Generate trade-specific plan percentage complete (PPC) data by simply moving cards.

### Facilitate true project team collaboration and continuous improvement.

- Give workers the confidence to discuss realistic timelines and find superb solutions.
- Automatically track data to analyze successes and failures.
- Identify setbacks in order to implement fixes and protect the schedule.
- Roll best practices into future projects with in-depth history, reporting, and project templates.

### Tap into essential info any place, any time with instant updates.

- Access cards on your mobile devices.
- Eliminate trips to the site office to review the commitments board.
- Get notified as soon as commitments change.

### Do what's impossible on paper.

- Make updates seamless with universal search, filter, and editing tools.
- Move data from and to related software, such as Oracle® Primavera P6.
- Enrich communications with comment threads, attachments, and rich text capabilities.
- Eliminate lost or unauthorized information thanks to comprehensive audit trails.
- Capture a project's complete history.

### Add value, remove waste, respect your people.

Newforma LeanPlanner is intuitive enough to identify one-off problems, yet intelligent enough to predict omni-project trends. Use reliable, authorized project information to anticipate constraints and capitalize on opportunities before they pass you by.
